

PL

PL101 Series

Head cable unit

Magnescan® Digiruler®

- Non-contact detection
- Magnetic detection system for excellent resistance to dust, oil, vibrations and shocks.
- Detects linear position and displacement and produces analog signal output when connected to the SL700 Series. Produces A/B quadrature signal when connected to MJ500/600 Series Interpolator
- A wide range of models is available so you can select the best model for your specific application.

SL

SL700 Series

Scale unit

MagneScale® Digitizer®

- Compact ribbon type scale for easy mounting in cramped spaces
- Non-contact detection
- Magnetic detection system with excellent resistance to dust, oil, vibrations and shocks.
- Effective length from 50 mm to 100,000 mm
- Detects linear displacement and produces analog or A/B quadrature signal output when connected to PL101 head and MJ500/600/620 Series interpolator (both sold separately).
- Three types are available with different reference point specifications.

Example for connection

Scale	Head	Cable	Interpolator
SL700	PL101	CE08	MJ500/600/620/700 MJ820/821 MJ830/831

Dimensions

*Scale thickness 0.3 mm max. (include double stick tape)

*Mount the scale on the non-magnetic material. When mounting on a magnetic material, insert a non-magnetic layer with a thickness of at least 3mm.
